

AFK 120-2

- Waste cooler for the cooling of organic waste
- nickel chromium steel 1.4301
- pre-drawn cover for weather protection of doors and door seals
- one rounded double door with lock, magnetic seal and fill opening in the lid for each bin
- 40 mm
- electronic control, without temperature display, mounted behind the panel, with spray water guard
- automatic defrosting and condensate evaporation
- inner room: IPX5, jet-proof, also applicable for cleaning with high-pressure cleaner
- precise positioning of the waste bin by means of waste bin locking mechanism
- powerful refrigeration machine for guaranteed cooling to +2°C
- corrosion-resistant nickel-chromium steel plate evaporator with 5 year warranty
- manufactured with smooth interior surfaces

Configuration

Gross volume	730 l
Refrigerant	R-134a / 650 g
Internal cladding	nickel chromium steel 1.4301
External cladding	nickel chromium steel 1.4301
Doors on the base unit	2 x Waste bin, 120 l
Temperature range	+2 bis +15 °C bei 30 °C UT und 55 % RF
Climate class	4 (+30 °C UT und 55 % RF)
Gross weight	200 kg
Net weight	180 kg

Dimensions (mm)

Width outside	1650
Depth outside	735
Height outside	1060
Width inside	1200
Depth inside	595
Height inside	930
Depth with open door	1310

Technic

Noise level	52 dB
Refrigerating capacity	390 W / VT -15 °C
Connection value	470 W / 230 V
Energy consumption	5,6 kWh / 24h
Protection class	Innenraum: IPX5, strahlwassergeschützt, auch für Reinigung mit dem Hochdruckreiniger geeignet außen: IPX2, tropfwassergeschützt
